Hope 139 Finds *AssureSign*® Electronic Signature Technology Perfect Solution for Virtual Company Needs

Biometric Electronic Signature Solutions Expedite Turnaround Time on Contracts

Orlando, Fla., June 30, 2008 – *AssureSign*® LLC's Biometric Electronic Signature Technology has been selected as the electronic signature solution by Hope 139, a company that works with schools, corporations and professional athletes to maximize cognitive functioning through a variety of brain training exercises using biofeedback/neurofeedback.

AssureSign is helping Hope 139, which operates as a virtual company, to go paperless and improve its efficiency by reducing the time it takes to execute training agreements from about one day to just 10 minutes, according to company president Bradley J. Oostindie. "It's the perfect solution for our business model, and client reaction has been very positive," he said. "They appreciate the speed with which we're able to respond to their needs using *AssureSign*, and they find it convenient and easy to use. It certainly helps show others the highly professional nature of our company."

AssureSign is a web-hosted service that facilitates the managed processing of documents in an all-digital, high-security environment. The patent-pending electronic signature software provides forensically identifiable evidence of contractual acceptance with digitized electronic signatures that can be matched for authentication in much the same way as a traditional signature.

In addition to its unique biometric technology, *AssureSign* LLC employs its recently launched DocumentNOW™ XML Interface Facility to permit *AssureSign* users to easily integrate the technology into their existing business processes. And since the entire *AssureSign* Electronic Signature Process is tracked digitally, users have a complete forensic audit trail of the delivery and signing process.

"With just a mouse, an Internet connection and our patent-pending electronic signature, signatories can securely retrieve and sign one or more documents in a matter of minutes, while they digitally track the entire process," said David W. Brinkman, chief executive officer of *AssureSign* LLC. "The sequence is seamless and virtually immediate, so it's the perfect solution for almost any business that requires signatures on contracts and other documents."

About *AssureSign* LLC

AssureSign LLC was launched in April 2008 to introduce biometric electronic signatures with advanced document processing controls. The new Orlando, Fla.-based business enterprise was spun off from its sister company 3PV® after the latter firm saw clear market demand for its *AssureSign* services. 3PV, a technology company that specializes in complete verification solutions for any type of business transaction, began pioneering electronic signature technology in early 2004 and has completed nearly 1 million e-signatures in the last two years.

About Hope 139

Hope 139 was co-founded in 2004 by Bradley J. Oostindie and Timothy G. Royer. The mission of Hope 139 is to assist each individual in reaching his or her God-given cognitive potential. The company utilizes neurofeedback and biofeedback equipment and develops individualized plans to assist others in improving focus, attention span, and anxiety reduction. The company provides

services in homes, corporations, educational settings, and to professional athletes. The company has been displayed in many media outlets, including national newspapers and national television. The co-founders also have had an opportunity to present the Hope 139 model to a member of the United State House of Representatives who sits on an Educational Committee. Currently, the Hope 139 model can be found in 26 states and 7 countries. Information about Hope 139 can be found on the website at www.hope139.com or by calling 1-888-You-R-139.
