

SOLUTION SPOTLIGHT:

Trigger

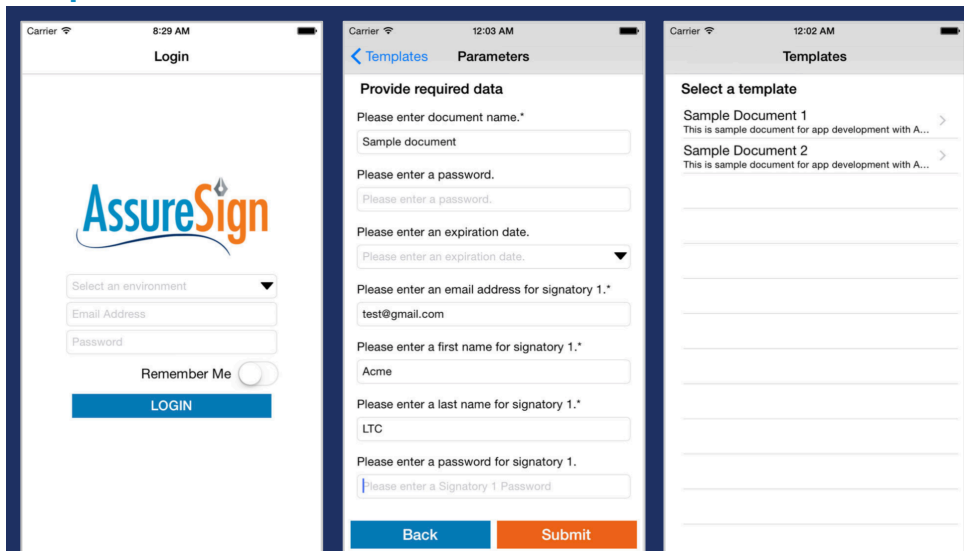

Explanation

The AssureSign Trigger application is a lightweight companion app for the AssureSign eSignature service, available to all validated AssureSign users. The app generates a simplified AssureSign interface that allows users to mobilize the signing process wherever internet connectivity is available.

Facts

- Available to all validated AssureSign users
- Functional in any environment where internet connectivity is available
- Operational on tablets, smartphones, and other internet-enabled devices
- Allows utilization of pre-created AssureSign templates and documents
- Features immediate presentment and email signing functionality
- Supports multiple signatories
- Provides tracking analytics and document completion notifications via the web portal
- Available on iOS, Android and Windows app stores

Steps to Success

1. **Log in** using your validated AssureSign user credentials.
2. **Enter** requested parameters (document name, signatory name, email, etc.)
3. **Select** a previously saved template & send!

BENEFITS

-  Mobilizes the signing process
-  Available on any device
-  No additional set up fees
-  Simplified user interface

TOP INDUSTRY USE CASES

-  Businesses on-the-go
-  Event planning services
-  Door-to-door sales industries
-  Extension of services to those with limited mobility

Get Started

Available to download, for free on iOS, Android and Windows app stores.
