

SOLUTION SPOTLIGHT:

Electronic Signature Software

Explanation

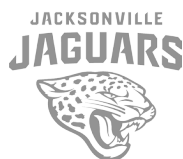

AssureSign is an electronic signature and digital transaction management solution that specializes in the automation, securement and storage of legally binding agreements. Our solution is a SaaS based product, with multiple deployment options, via cloud, hybrid, or on-premises. AssureSign's flexible APIs deliver a seamless integration with CRM, ERP, or industry-specific data platforms.

Our patented electronic signature software provides forensically identifiable evidence of contractual acceptance with digitized electronic signatures. Signatories can eSign by either hand signing or typing their signature, store and/or transmit documents and contracts electronically. AssureSign is used to quickly obtain biometric or certified electronic signature authorization of documents by one or more signatories located anywhere in the world.

Facts
